Education

INACAP

Programmer Analyst
2023 – 2025

Additional Training

- Platzi
- Free Code Camp
- The Odin Project

Technologies

- HTML / CSS
- JAVASCRIPT
- REACT.JS
- TYPESCRIPT
- TAILWINDCSS
- NODE.JS / EXPRESS
- POSTGRESQL
- GIT / GITHUB

Languages

Spanish: Native

English: Intermediate
(technical reading)

Professional Profile

Programmer Analyst focused on building modern web applications using best practices in architecture, performance, and code quality. I have experience with React.js and its ecosystem to create dynamic interfaces and complete functionalities.

My goal is to continue improving as a developer and build scalable, maintainable, and professional-standard solutions.

Experience

❖ Saram – Booking System and Landing Page (Freelance, 2025)

Development of a complete system for scheduling therapy appointments and an informative landing page showing services, pricing, and business details.

- Designed and developed a modern, responsive landing page.
- Implemented a booking system with date, time, and therapy-type selection.

Technologies: React / TailwindCSS / Express

Recent Projects

❖ QuizGen – Quiz Generator (2025)

Web application that generates personalized quizzes based on categories selected by the user.

Technologies: React / TailwindCSS / Zustand

❖ Developers Growing – Developer platform (2026)

I developed a full-stack web application geared towards the developer community, with the goal of enabling them to share their ideas or create them together with a team.

Technologies: React.js / Typescript / TailwindCSS / Node.js / Express / MongoDB
